

**Safe, compliant chemical logistics services on the West Coast.**

Put inventory closer to your Western U.S. customers for fast delivery or same-day pickup.

# Leaders in West Coast Chemical Logistics

Storing and shipping chemical products requires specialized know-how, from managing safety risks to managing inventory. It's a job for trained, experienced professionals. Chemical logistics has been a strategic focus for Weber since 1970. Since then, we've served some of the world's largest chemical companies.

By integrating your chemical logistics services, from port to market, Weber reduces service risks associated with multiple providers and maintains the integrity of your product throughout the distribution cycle – including adherence to temperature control requirements.

## Warehousing

13 segregated storage rooms to meet requirements for temperature range, fire prevention, and security

## Transportation

Safe and reliable transport with intra- and inter-state hazmat permits and authority

## Drayage

Asset-based dray fleet serving SoCal & NoCal ports

The image shows two large blue metal drums of Diacetone Alcohol. The drums are positioned side-by-side, with their labels clearly visible. The labels are white with black text and red hazard symbols. The text on the labels includes "DIACETONE ALCOHOL", "UN 1148", "MADE IN INDIA", and "WARNING". The hazard symbols include a flame in a red diamond and an exclamation mark in a red diamond. The drums are stacked, with the top drum's label being the most prominent.

# West Coast Chemical Storage and Distribution

Weber specializes in storing and distributing a range of hazmat materials, including flammables, corrosives, oxidizers, gases and powder coatings. Whether you need a dedicated facility or shared warehouse space, Weber creates the safest environment for our staff and your product.

Our Santa Fe Springs, CA chemical distribution center includes:

- 13 segregated rooms to handle specific product types and temperature ranges.
- Segregated H2, H3, H7 and S2 occupancy areas.
- Safety features, such as EE-rated equipment and firewalls.
- Corrosive Room, oxidizer rooms, temperature-controlled flammable storage and heated rooms (75° - 90°).
- A team of on-site hazmat specialists that assume responsibility for training, DOT compliance, SARA reporting, SDS training and reporting, and compliance with NFPA, UFC, IATA and OSHA standards.

# Service Advantages

THIS FACILITY IS CFATS COMPLIANT  
DRIVERS ARE REQUIRED TO PRESENT A  
PHOTO ID UPON ENTERING BUILDING  
DRIVERS REPORT TO SHIPPING OFFICE  
VISITORS REPORT TO FRONT LOBBY

## Rapid Order Fulfillment

Improve service levels to West Region customers by maintaining local inventory in California. We provide distribution of finished goods and raw materials to local manufacturing plants. Services include same-day fulfillment of orders and will-call pickups.

## 24/7 Visibility

Maintain real-time visibility of your products as they move throughout the supply chain using Weber's systems and customer portal. You can trace orders using your own reference or purchase order numbers.

## Reduced Risk

Weber SOPs for chemical storage and handling comply with stringent regulatory requirements, so you're always "audit ready." We are C-TPAT-compliant, and our chemical warehouse is used as a training site by the LA County Fire Department.

# The Weber Way

In 1924, Karl Weber took a risk and entered the relatively new field of third party logistics, using the delivery fleet of his furniture business to handle commercial shipments. 90+ years later, that entrepreneurial spirit and commitment to excellence remain core cultural traits as Weber Logistics – still family owned – has become a premier provider of integrated logistics services on the West Coast.

**On Logistics Solutions:** We don't design a solution FOR you, we design it WITH you, working to jointly solve your specific problem.

**On Logistics Operations:** We expect to get it right every time. When we don't, we want to know why. Superior operations require a company-wide belief that every pick, every shipment, every delivery is an opportunity to do great work.

**On Customer Satisfaction:** If you need to *tell us* you're unhappy, our system has broken down. Weber's business is built around staying close to you, identifying concerns early and addressing them immediately.

“ There's no great secret to success as a 3PL. It comes down to blocking and tackling. Showing up every day and caring enough to get orders out the door accurately and on time – and then doing it all again the next day, just a little bit better. ”

## Let's Talk

We'd love an opportunity to discuss your chemical logistics needs directly. This could be just a short phone chat, or a more detailed discussion. This consultation involves our logistics experts sitting down with you, at no charge and with no obligation, to learn about your logistics challenges and then provide you with ideas on ways to drive down costs and improve service.
