

## FROM THE PORTS OF L.A., LONG BEACH, OAKLAND, AND SAN DIEGO STRAIGHT TO YOUR CUSTOMERS

With a large drayage fleet and our own drivers, Weber Logistics gets your products off port and to the market faster.

Port services can be fully integrated with our warehousing and transportation services to simplify and speed your supply chain.

## WEBER PORT SERVICES

**Drayage:** Increase your flexibility and reduce costs by using Weber's 24/7 drayage services, allowing you to move freight during off-peak hours. We proactively manage on- and off-dock time limits to minimize demurrage and detention charges. Services are provided by uniformed Weber drivers—not independent contractors.

**Transloading:** Speed distribution cycle time and improve your cash flow. Weber will receive and process your rail or ocean freight containers and load your products onto trailers for final outbound distribution.

**Overweight Corridor Services:** Cut costs by shipping overweight and reducing the number of containers shipped. Weber can receive your overweight containers from the Ports of L.A. and Long Beach and perform transloading and/or weight reduction services to get products on the move quickly. Weber has all necessary permits as well as hazmat-certified drivers.

**Chemical Drayage Services:** All Weber fleet operations are permitted to transport hazardous materials, complimentary to our hazardous materials warehousing and transloading operations.

## HIGHLIGHTS

- Weber operates 4 transportation service centers near California ports, including a new Downey, CA container yard that stores up to 140 chassis.
- Weber employs company drivers, not independent contractors, to keep you compliant with AB5.
- Weber is a member of the EPA SmartWay emissions reductions program. Our fleet has maintained the highest EPA rating.
